Greenwich High School
Crisis Committee Application for 2050 National Security Council

1. My past Model UN experience includes 6 conferences, The Best Delegate Ambassador Summer Program, and the Best Delegate Secretary General Summer Program. I have won three Outstanding Delegate, one Best Delegate, and one Honorable Mention.
2. I believe the cause of the next global conflict will be lack of food, shelter, and water.
3. My utopian future is one with international health care, affordable medicine, ubiquitous political peace, and overall elevated levels of citizen happiness. This is my favorite due to the fact that it would be ideal for all human beings.
4. My favorite dystopia is one where there is a dictator ruling over the citizens, using many different elements of hypnosis and psychology to control the people. I like this proposition because it is one in which the general public would want to rebel against the leadership.
5. It is easier to imagine the end of capitalism. The end of capitalism would look like the downfall of the College Board and the ultimate corruption of Wallstreet, among other things.
6. In 2050, I will be the Ambassador to the United Nations for the United States of America. I will be helping to reach the development millennium goals set for that period of time. I will be a key public figure who is *actually* making a difference for the the global community in a positive way.
